Re: ***WATER SERVICE IMPROVEMENT PROJECT IN YOUR AREA***

Dear Manchester Utilities Authority Customer:

As you are aware, the Manchester Utilities Authority has embarked on an important project that will improve the water quality, water pressure, and water system reliability in your area. This project is just one of many on-going capital improvement projects that the Authority is accomplishing that will improve the water system and services.

The static pressure of the water supplied by the Authority to you and its other customers on Ross Lane and Linda Vista Avenue, which is currently served by the Manchester Avenue Booster Station, will increase by approximately 60 pounds per square inch (psi) on Friday December 2, 2016 at 5:00 PM. We are making this improvement so that we can maintain a pressure greater than 20 psi throughout the service zone under all flow conditions as required by state and federal regulations and so the ordinary pressure will be greater than 40 psi for all our customers served by this zone.

We recommend that you take the following actions:

1. Consult your plumber to learn whether you need changes to your internal plumbing, such as a pressure reducing valve, an expansion tank, or a new hot water tank pressure relief valve to avoid leakage caused by the higher pressure.
2. Be certain that your water shut-off valve is in good, working condition.
3. Monitor your household plumbing for a time after the activation to be certain that the plumbing does not have a defect that would cause leakage.
4. In case of an emergency, please call 973-790-4444.

The Authority thanks you in advance for your anticipated cooperation. If you have any questions, please do not hesitate to contact our office or visit our website: www.muawater.net.

Very truly yours,

MANCHESTER UTILITIES AUTHORITY

Victor J. D'Ambrosio
